

BRAND GUIDELINE

AERA

Advanced Ecosystem of Rail Analytics

Version 1.0

ABOUT THIS GUIDELINE

One mark, used the same way everywhere

This guideline sets out the AERA logo and how to use it: the mark and what it means, its construction, versions and lockups, colour and type. Follow it for the app, reports, slides, posters and anything printed.

WHAT AERA IS

A digital twin of the Kelana Jaya Line

AERA is a digital twin of the LRT Kelana Jaya Line in Kuala Lumpur. It runs every train on the published timetable at real time and predicts how crowded each train, and each car, will be, using ridership data from data.gov.my. Riders use it to choose a quieter train or car; control-room staff use it to see where the line is under pressure.

The logo has to work for both groups: friendly enough for a rider's home screen and serious enough for an operator's console.

THE NAME

AERA

Advanced **E**cosystem of **R**ail **A**nalytics

The word is older than the acronym. In Latin, *aera* is the plural of *aes*, bronze: the bronze counters used to keep accounts. Late Latin used *aera* for the fixed point from which years were counted, which gave English the word *era*.

AERA counts riders car by car and marks the moment a train gets busy, so the name already carries the product's story.

37
stations on the Kelana Jaya Line

4
cars per Innovia Metro 300 train

800
riders per train at full capacity

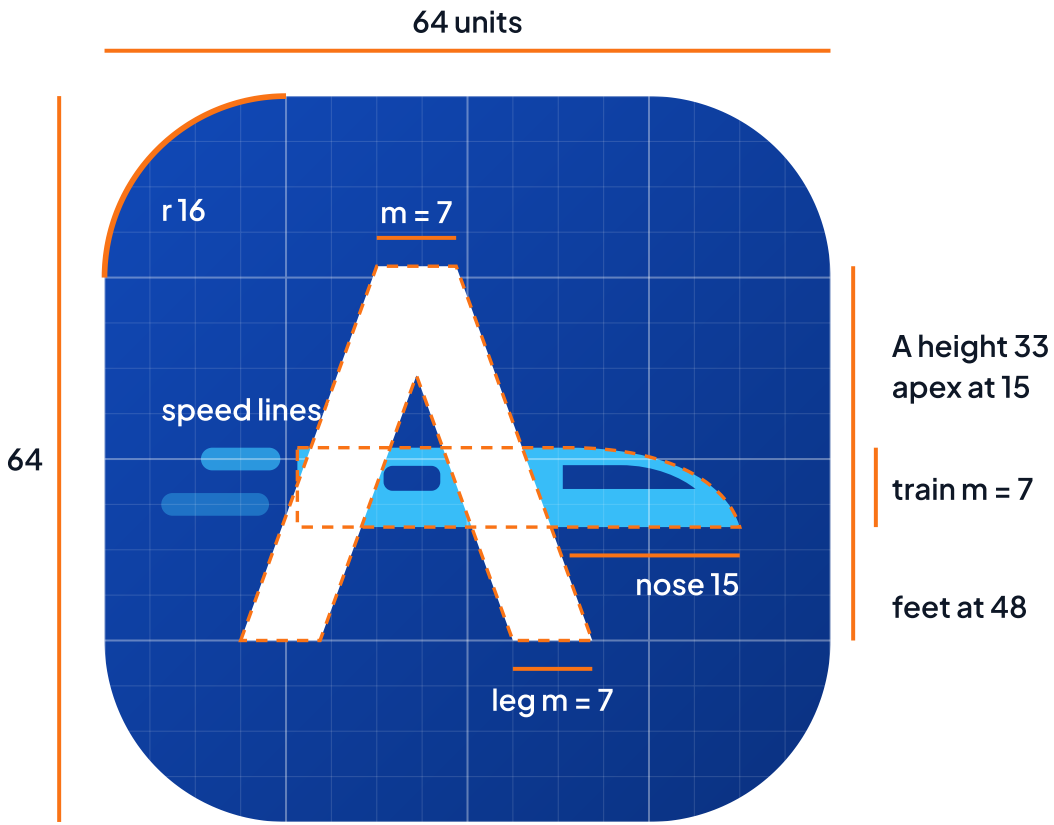

5
crowding levels, from Quiet to Packed

WHAT IT MEANS

The train runs through the A

1. **The A** is for AERA. It is drawn, not typed: a flat top and straight legs, all one width, so it stays solid at 16 px.
2. **The train** sits where the A's crossbar would be. The train is what holds AERA together. It points right, forwards: AERA looks ahead and forecasts.
3. **The windows**, a cab window in the nose and a side window between the legs, make it read as a train and not a bar.
4. **The speed lines** say real time: the twin moves with the timetable at Kuala Lumpur time.
5. **The navy tile** stands for trust and operations. Its 16–unit corners match the cards in the app and the shape of a phone icon.

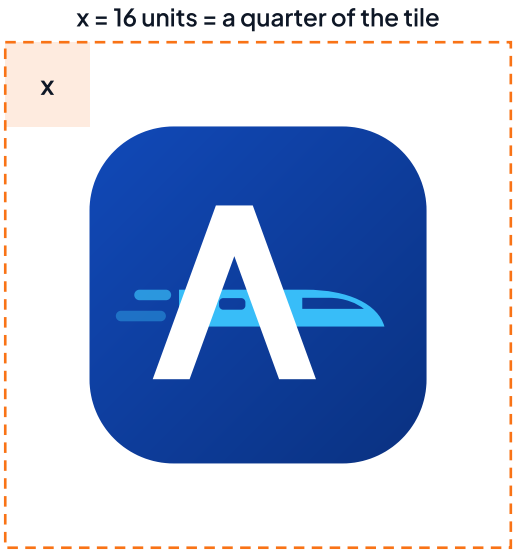

CONSTRUCTION

Drawn on a 64-unit grid

- **One module, m = 7 units,** sets the apex width, the width of each leg and the height of the train.
- **The A** is 33 units tall, from the apex at 15 to the feet at 48. Its legs lean 12 units across in 33 units up (about 70°).
- **The train** runs from 31 to 38 and its nose ends at 56, 8 units from the tile's edge. The nose curve is 15 units long.
- **The speed lines** are 2 units tall with 2 units between them, at 70% and 40% opacity on the tile.
- **The tile** is 64 units square with 16-unit corners and runs from AERA Blue at the top left to AERA Navy at the bottom right.
- **Below 24 px**, use the small version: no speed lines and no side window, shifted 2 units left to rebalance.

CLEAR SPACE

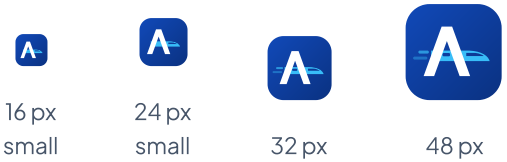

Give it room

Keep a clear space of **x** on every side, where x is a quarter of the tile's width (16 units, the same as the corner radius). No text, edge or other logo enters it. Lockups use the same x, measured from the tile.

MINIMUM SIZE

Never smaller than this

Mark, screen	16 px minimum. Use `aera-mark-small` up to 24 px.
Mark, print	8 mm minimum.
Horizontal lockup	96 px or 25 mm wide.
Tagline lockup	180 px or 45 mm wide, so the full name stays readable.

VERSIONS

Pick the version for the background

Primary

`aera-mark`

Small, 24 px and below

`aera-mark-small`

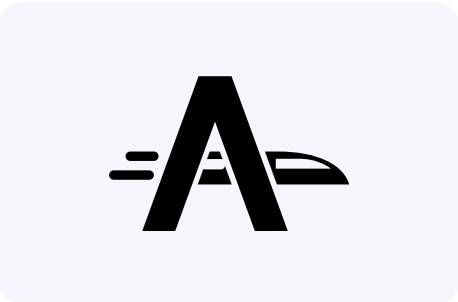

On light

`aera-mark-on-light`

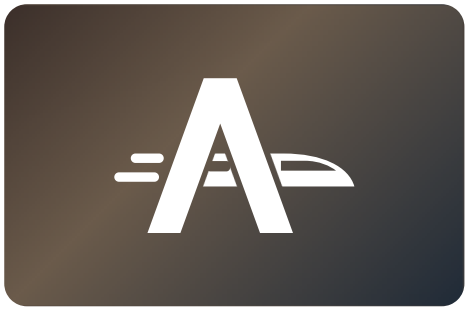

On dark

`aera-mark-on-dark`

One colour, black

`aera-mark-mono-black`

One colour, white

`aera-mark-mono-white`

Maskable (Android)

`aera-mark-maskable`

Phone icon (iOS)

`aera-app-icon-ios-1024.png`

LOCKUPS

The mark with its name

The wordmark is AERA in Plus Jakarta Sans ExtraBold, outlined, with tracking tightened by 1%. In the horizontal lockup its capitals are as tall as the A in the mark and sit on the same baseline, with a gap of x between them. On navy and dark backgrounds the reverse lockups drop the tile, which would disappear into the background.

Horizontal (default)

`aera-lockup-horizontal`

Horizontal, reverse

`aera-lockup-horizontal-reverse`

With the full name

`aera-lockup-tagline`

Stacked

`aera-lockup-stacked`

Stacked, reverse

COLOUR

Navy, blue and the light blue of the train

AERA Blue

HEX #1149B8
RGB 17 73 184
CMYK 91 60 0 28

Top of the tile gradient. Primary brand colour.

AERA Navy

HEX #0A3180
RGB 10 49 128
CMYK 92 62 0 50

Bottom of the tile gradient; the A on light backgrounds.

Rail Sky

HEX #38BDF8
RGB 56 189 248
CMYK 77 24 0 3

The train on the tile and on dark backgrounds.

Rail Sky Deep

HEX #0284C7
RGB 2 132 199
CMYK 99 34 0 22

The train on white, where Rail Sky is too light.

Ink

HEX #0E1726
RGB 14 23 38
CMYK 63 39 0 85

Wordmark and text on light backgrounds.

Signal Orange

HEX #F97316
RGB 249 115 22
CMYK 0 54 91 2

Accent for highlights in the app. Never inside the logo.

PAIR	CONTRAST
White on AERA Navy	11.9 : 1
White on AERA Blue	7.9 : 1
Rail Sky on AERA Navy	5.6 : 1
Rail Sky Deep on white	4.1 : 1
Ink on white	18.0 : 1

CMYK values are converted directly from RGB; ask the printer for a proof before a print run. Crowding colours (green to red) and line colours belong to the app's data and are never used in the logo.

TYPEFACE

Aa

Plus Jakarta Sans

Designed by Gumpita Rahayu (Tokotype) for the +Jakarta city identity, and free under the SIL Open Font License. It is a modern geometric sans from the region, clear on small phone screens. AERA uses it for the wordmark, the app and every document.

MISUSE

Do not change the mark

Do not stretch or squash it.

Do not recolour the tile. Line red belongs to the Kelana Jaya Line.

Do not colour the train with crowding colours; they carry data.

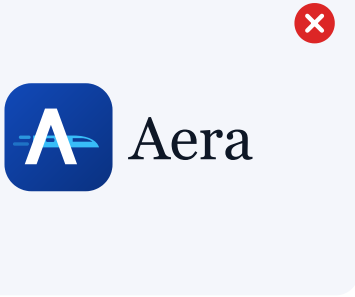

Do not rotate or tilt it.

Do not put the untiled mark on busy images. Use the tile.

Do not draw it in outline.

Do not retype the wordmark or change its font.

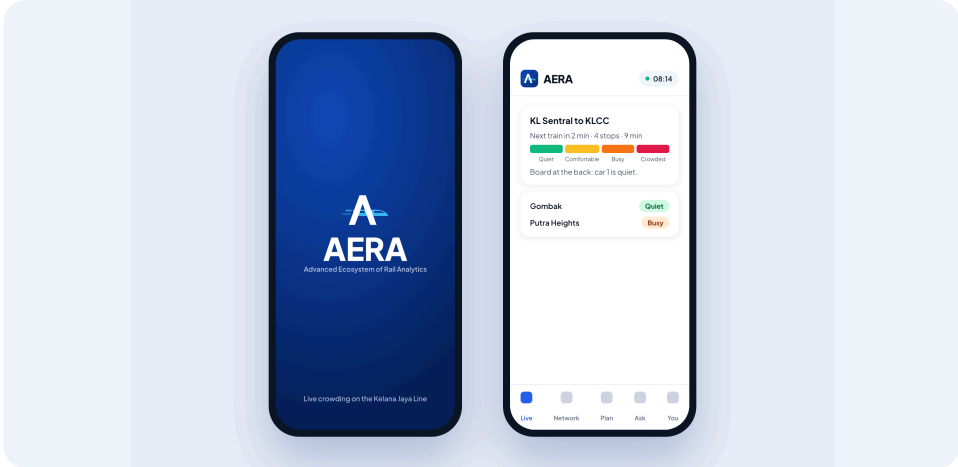

Do not add glows, bevels or heavy effects.

APPLICATIONS

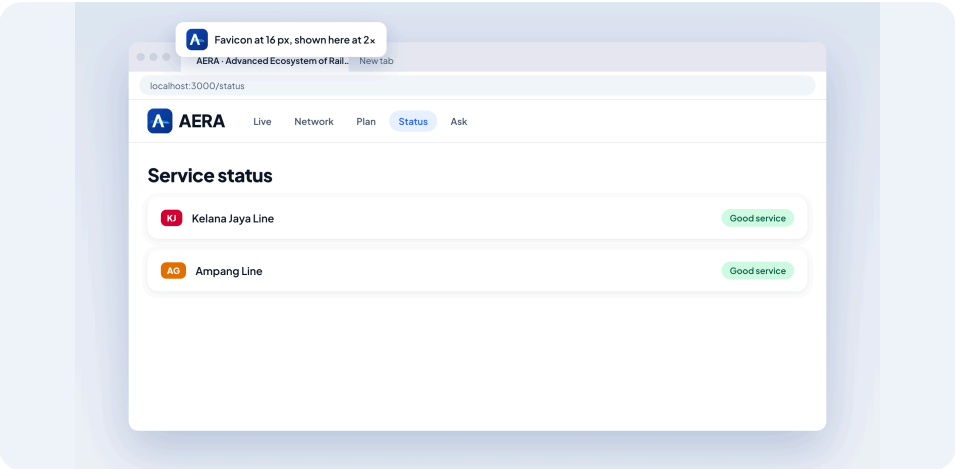

On screen

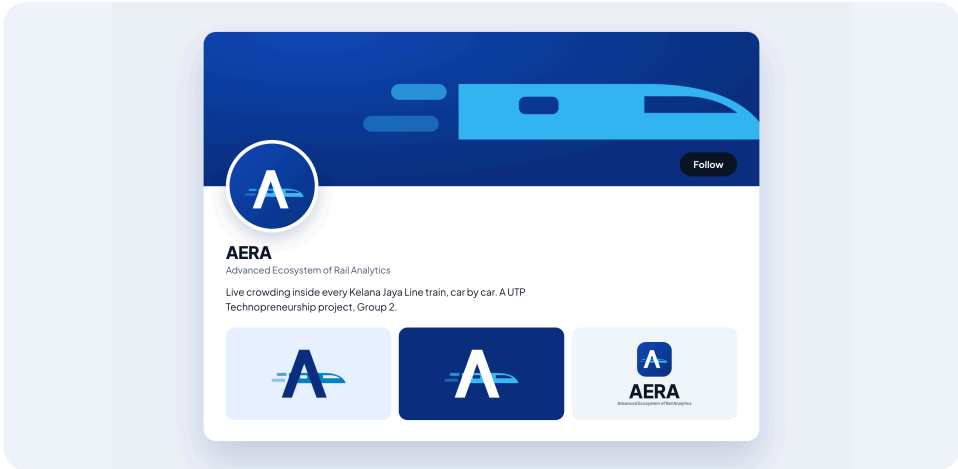

App icon on a phone home screen

Splash screen and app bar

Favicon and web app bar

Social media profile

APPLICATIONS

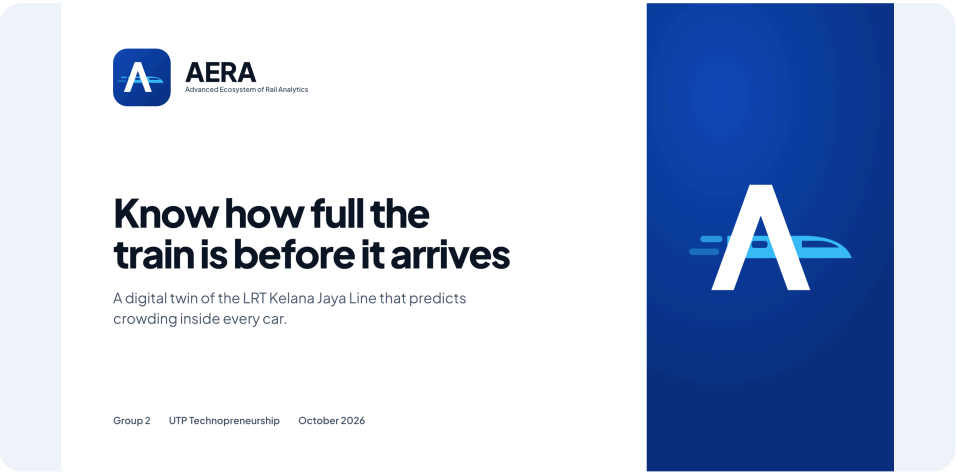

In print and in person

Business card, front and back

Platform poster

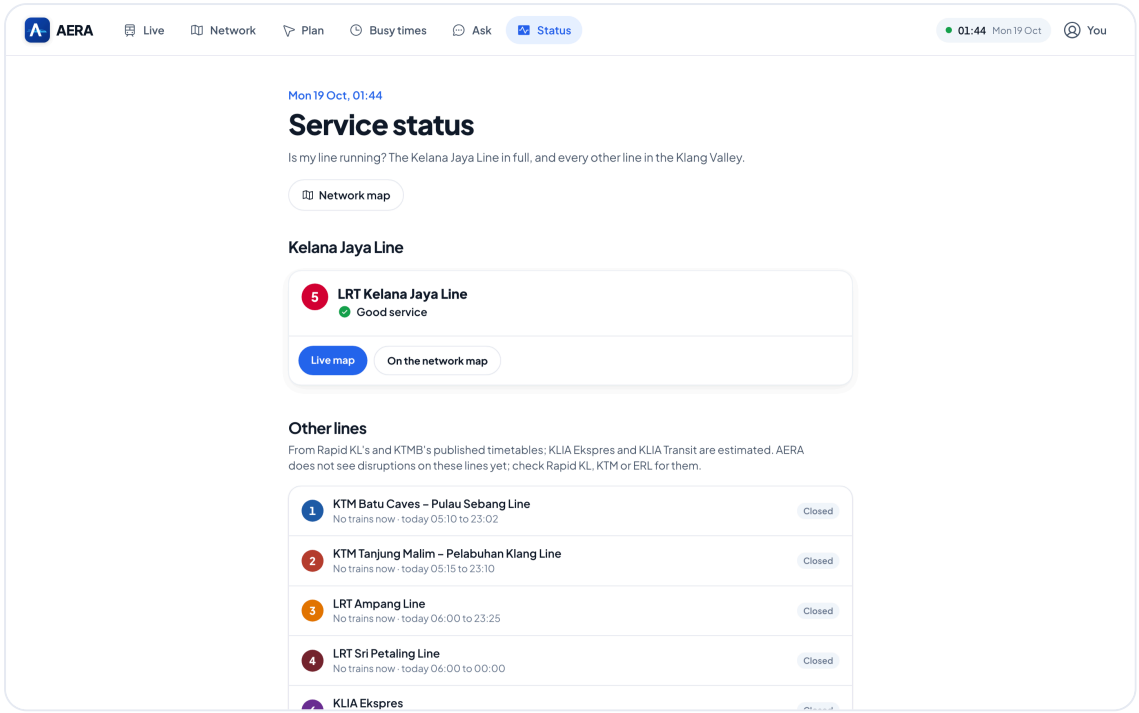

Presentation title slide

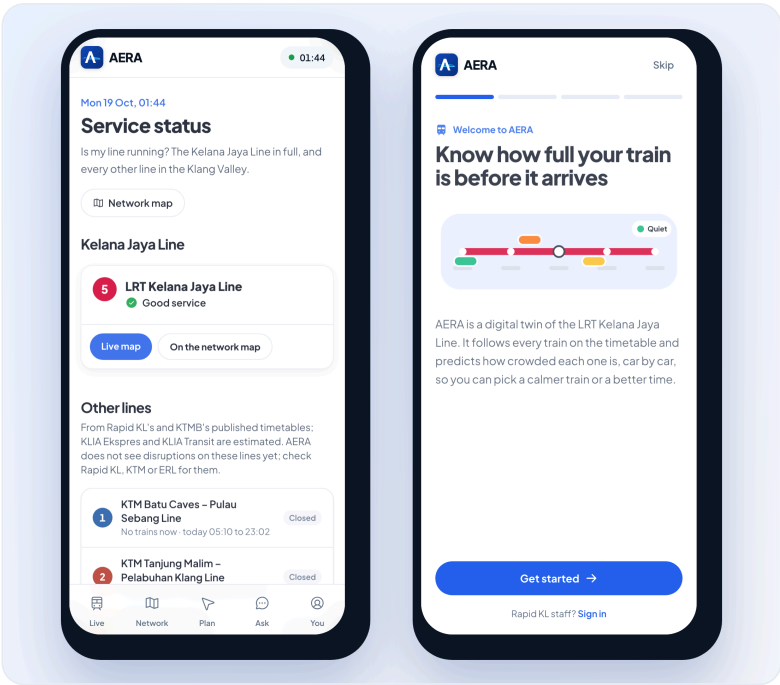

Operator staff badge

IMPLEMENTATION

Express in the live app

Service status page at 1440 px: the Express mark and wordmark in the app bar.

Service status and the welcome flow on a 390 px phone.

The app draws the mark in code (`LogoMark` in `frontend/components/TopBar.tsx`, colours from `--brand-*` in `theme.css`) and uses the generated `icon.svg`, `favicon.ico` and phone icons.
